

Dromex

LEATHER APRONS ACE ONE RANGE

ACE ONE 60X90

ACE ONE 60X120

Description

Dromex® Ace One range of natural cow hide split grain leather aprons protects the user and clothing from the hazards of hot metal contact and slag that is generated while welding, grinding or using a cutting torch.

Ace One aprons are available in 2 sizes:

- ACE ONE 60cm (length) x 90cm (height), offering torso and lower waist protection.
- ACE ONE 60cm (length) x 120cm (height), full apron that protects the welder's entire front side.

Suitable for use in welding applications, used in the maintenance, manufacturing and carpentry industries.

Leather has long been considered the best protective material for welding applications. The relative thickness of leather prevents heat from penetrating through the garment and also provides excellent abrasion and puncture resistance.

Special Instructions

None of the materials or processes used in the manufacture of these products are known to be harmful to the wearer. The manufacturer has examined under the system for ensuring quality of production by means of monitoring and inspection. These leather aprons are designed to accommodate the basic safety requirements and standards for Personal Protective Equipment. The information contained herein is intended to assist the wearer in the selection of personal protective equipment. Actual conditions of use cannot be directly simulated in a test environment therefore it is the responsibility of the end user and not the manufacturer or supplier to determine the apron suitability for the intended use. All aprons should be thoroughly inspected before and after use to ensure no damage is present.

Sizes Available

Standard.

Packaging, Storage & Obsolescence

- ACE ONE 60x90, sold as 50 units, bundled in a polybag.
- ACE ONE 60x120 sold as 40 units, bundled in a polybag.

Cleaning & Maintenance

Leather aprons should not be left in a contaminated condition if re-use is intended especially if potential hazards exist. The apron should be decontaminated before storage and re-use as indicated below:

- Brush excess dirt and contaminant off.
- Wipe with a damp rag, soaked in mild detergent.
- Dry leather apron with a clean soft rag to remove excess detergent and allow to air dry thereafter. Stiffening of the leather may occur.

Disposal

All industrial waste should be disposed of correctly according to local regulations and good disposal practice. Aprons should be disposed of considering the hazardous substances they were used for. Please consider recycling.
