

Dromex

FLAME RETARDANT SOCKS

DF-9162-CH

Description

Dromex® flame retardant, industrial work socks are designed with sustainably produced inherently flame-resistant Lenzing FR fibres that will not burn when exposed to heat and flame. Are anti-static rated to safety prevent and eliminate electrostatic charge by conducting static build up.

Constructed with wool and nylon, these socks feature the following properties:

- Reinforced heel and toe for durability.
- They absorb moisture quickly and wick perspiration away from the foot, keeping it dry, comfortable and odour free/fresh.
- A natural insulator, keeping feet thermally balanced (cool in hot temperatures and warm in cold conditions).

These socks are available in one colour only:

- Grey: (Code: DF-9162-CH)

Suitable for use in manufacturing environments such as steel mills, oil, gas, petrochemical and electrical industries, gasoline/petrol dispensers, fighter pilots, construction and mining and must be worn with thermal protective footwear.

Special Instructions

Do not expose to prolonged and large sources of intense heat as in a conflagration.

None of the materials or processes used in the manufacture of these products are known to be harmful to the wearer.

The manufacturer is examined under the system for ensuring quality of production by means of monitoring and inspection.

These socks are designed to accommodate the basic safety requirements and standards for Personal Protective Equipment.

The information contained herein is intended to assist the wearer in the selection of personal protective equipment.

Actual conditions of use cannot be directly simulated in a test environment therefore it is the responsibility of the end user and not the manufacturer or supplier to determine the socks suitability for the intended use.

All socks should be thoroughly inspected before and after use to ensure no damage is present. If socks are damaged upon inspection or during use, dispose of the socks and replace immediately.

Compliance & certifications

EN ISO 13688:2013+A1:2021 – General performance requirements for ergonomics, innocuousness, size designation, ageing, compatibility and marking of protective clothing (Size and comfort).

EN 1149-5:2018 – Protective clothing – Electrostatic properties, part 5 material performance and design requirements.

EN ISO 14116:2015 – Protective clothing – Protection against flame – Limited flame spread material assemblies and clothing.

Specifications

Style: Grey, flame retardant mid length socks.

Fabric composition: 48% Wool, 44% Lenzing FR, 6% Polyamide and 2% Elastane.

Packaging, Storage & Obsolescence

These socks are packaged as a pair.

Store in a cool dry place, away from humidity and out of direct sunlight.

Stored correctly, the socks physical properties will not change for up to 12 months.

Cleaning & Maintenance

These socks retain their shape after washing.

Dromex® flame retardant socks can be cleaned as follows:

- Machine wash at 30°C.
- Wash inside out.
- Wash on delicate cycle.
- Line dry is preferable however socks can be tumble dried on a low-temperature.
- Ensure socks are rotated daily.

Sizes Available

Large: Fits shoe sizes 8 - 11.

Disposal

All industrial waste should be disposed of correctly according to local regulations and good disposal practice. Socks should be disposed of considering the hazardous substance they were used for. Please consider recycling.
