

Dromex

CUT5 CHEMICAL GLOVE PLUS

57H201PLUS

EN 388: 2003

4543

EN407: 2004

X2XXXX

Description

Dromex® 57H201PLUS consists of a 100% Dromex® CUT5 outer liner, reinforcing the HCT (Hybrid coating technology) multilayer nitrile coating. It provides protection against cut, abrasion and heat for use in industries such as steel and glass sheet handling, mining, construction work, chemical handling and oil and gas.

Contact heat protection of the glove is based on the temperatures at which the wearer will feel no pain for at least 15 seconds and at a level 2 contact temperature of 250°C.

Consists of a 100% cotton inner liner for added breathability and comfort. The rough HCT surface finishing gives an excellent grip in oily conditions.

Special Instructions

Although the manufacturer has examined these gloves under the system for ensuring quality of production by means of monitoring and inspection, we recommend that all gloves should be thoroughly inspected before use to ensure no damage is present.

None of the materials or processes used in the manufacture of these products are known to be harmful to the wearer. The gloves and information contained herein are designed to accommodate the basic safety requirements and standards for Personal Protective Equipment. Actual conditions of use cannot be directly simulated in a test environment, therefore it is the responsibility of the user and not the manufacturer or supplier to determine the suitability for intended use.

Compliance & Conformity

Complies with the requirements of CE type examinations EN 420 for innocuousness, EN 388 for compliance with directive 89/686/EEC Mechanical Risks (4,5,4,3) and EN 407:2004 Thermal Risks for Heat and Flame. Quality System conforms to ISO 9001:2008 and environmental management system ISO 14001:2015 system certificates or acceptable equivalent.

Specifications

Style: Wing thumb, fully dipped glove
 Liner: Cotton
 Palm: HCT (Hybrid coating technology) multilayer nitrile coating 2mm ± 5 %
 Back: HCT (Hybrid coating technology) multilayer nitrile coating 2mm ± 5 %
 Cuff: 100% Dromex® Cut5
 Mass: ± 218g per glove

Packaging, Storage & Obsolescence

Packed 12 pairs per bundle and 120 pairs per carton for shipping. Store in a cool, dry place. Stored correctly, the gloves physical properties will not change for up to three years.

Cleaning & Maintenance

Gloves should not be left in a contaminated condition if re-use is intended especially if potential hazards exist. Before removal from the hands excess contaminant should first be removed from the gloves. Should this not be possible, it is advisable to ease left and right hand gloves off using the gloved hand and remove the gloves without the contaminant contacting the bare hands.

The gloves may then be decontaminated as indicated below:

In order to maximise the glove life cycle, we recommend the mildest possible cleaning conditions in terms of temperature, chemicals and cycle duration.

Due to a wide variety of possible constructions and combinations with other materials we recommend to always consult your professional cleaning service to determine the best suitable cleaning method.

Disposal

All industrial waste should be disposed of correctly according to local regulations and good disposal practice. Safety gloves should be disposed of considering the hazardous substance they were used for or could be contaminated with. Please consider recycling.

Sizes Available

Code	Size	Palm Length
57H201PLUS-8	S/M	95mm (±2mm)
57H201PLUS-9	M/L	105mm (±2mm)
57H201PLUS-10	L/XL	115mm (±2mm)

* As per the EN420 standard, actual measurement of gloves are determined by the manufacturer, taking into account the behaviour of the glove material, its thickness (such as leather gloves, PVC gloves etc), elasticity and the intended use.

* Sizing charts only serve as a guide. Sizes and measurements are for reference only. In order to make an informed decision, always try on the gloves as each glove features a unique construction to accommodate a wearer's preferences.

Measurement Guide

Materials

1. Wing thumb
2. Fully dipped HTC nitrile coating
