NITRIFLEX COATED GLOVES

NITRIFLEX

EN 388:2016 +
A1:2018

4131X

Description

Dromex® sanitized Nitriflex, fully coated nitrile micro foam finish gloves, provides excellent grip performance in wet and dry environments. The sanitization treatment suppresses the reproduction of microbes, such as bacteria and fungi and hinders both unpleasant odours as well as material damage from mildew.

The nylon liner with spandex provides superior sensitivity and dexterity whilst the nitrile coating protects the hand from high abrasion and cut resistance with stronger tear resistant properties.

Suitable for applications of handling/assembling small oily parts, general assembly machining, micro-engineering and automotive components.

Special Instructions

Although the manufacturer has examined these gloves under the system for ensuring quality of production by means of monitoring and inspection, we recommend that all gloves should be thoroughly inspected before use to ensure no damage is present.

None of the materials or processes used in the manufacture of these products are known to be harmful to the wearer. The gloves and information contained herein are designed to accommodate the basic safety requirements and standards for Personal Protective Equipment. Actual conditions of use cannot be directly simulated in a test environment, therefore it is the responsibility of the user and not the manufacturer or supplier to determine the suitability for intended use.

Compliance & Conformity

Complies with the requirements of CE type examinations EN ISO 21420:2020 for innocuousness, EN 388 for compliance with directive PPE Regulation 2016/425 Mechanical Risks (4,1,3,1,X) and for Quality System conforms to ISO 9001:2008.

Specifications

Style: Fully coated nitrile micro foam gloves.
Liner: Grey nylon spandex.
Palm: Black micro foam 0,1 mm ± 5%.
Back: 0,1mm ± 5%.
Cuff: Nylon spandex composite knitted wrist.
Mass: 39 ± g per pair (size 11).

Packaging, Storage & Obsolescence

Packed in individual polybags and sold as 120 pairs per carton for shipping. Store in a cool, dry, dark place. Stored correctly, the gloves physical properties will not change for up to three years.

Cleaning & Maintenance

Gloves should not be left in a contaminated condition if re-use is intended especially if potential hazards exist. Before removal from the hands excess contaminant should first be removed from the glove. Should this not be possible, it is advisable to ease left and right hand gloves off using the gloved hand and remove the gloves without the contaminant contacting the bare hands.

The gloves may then be decontaminated as indicated below.

In order to maximise the glove life cycle, we recommend the mildest possible cleaning conditions in terms of temperature, chemicals and cycle duration.

Due to a wide variety of possible constructions and combinations with other materials we recommend to always consult your professional cleaning service to determine the best suitable cleaning method.

Disposal

All industrial waste should be disposed of correctly according to local regulations and good disposal practice. Gloves should be disposed of considering the hazardous substances they were used for. Please consider recycling.

Sizes Available

Code	Size	Palm Length	Cuff Colour
NITRIFLEX-7	XS/S	85mm (±5mm)	Red
NITRIFLEX-8	S/M	95mm (±5mm)	Yellow
NITRIFLEX-9	M/L	100mm (±5mm)	Brown
NITRIFLEX-10	L/XL	105mm (±5mm)	Black
NITRIFLEX-11	XL/XXL	110mm (±5mm)	Light Blue

* As per the EN420 standard, actual measurement of gloves are determined by the manufacturer, taking into account the behaviour of the glove material, its thickness (such as leather gloves, PVC gloves etc), elasticity and the intended use.

* Sizing charts only serve as a guide. Sizes and measurements are for reference only. In order to make an informed decision, always try on the gloves as each glove features a unique construction to accommodate a wearer's preferences.

Measurement Guide

Materials

1. Wing thumb
2. Fully dipped fingers & palm
3. Knit wrist
