1412A

1412A

EN 388: 2003

2243

Compliance & Conformity

Tested in accordance with the European directive for PPE (89/686/EEC) for complex design and is compliant with EN 388 for Mechanical Risks (2,2,4,3).

Specifications

Style: Rubber palm coating
Liner: Machine knitted 7gg yellow cotton liner
Palm: Green textured crinkled rubber
Mass: +-104g per pair (size 10)

Sizes Available

8-10

Packaging, Storage & Obsolescence

Packed in individual sealed plastic packets and 120 pairs (packs of 12) per carton for shipping. Store in a cool, dry place. Stored correctly, the gloves physical properties will not change for up to five years.

Cleaning & Maintenance

Gloves should not be left in a contaminated condition if re-use is intended especially if potential hazards exist. Before removal from the hands excess contaminant should first be removed from the glove.

Should this not be possible, it is advisable to ease left and right hand gloves off using the gloves hand and remove the gloves without the contaminant contacting the bare hands. The gloves may then be decontaminated with a mild detergent solution, then rinsed with clean water and air dried.

Shrinkage can occur after washing.

Disposal

All industrial waste should be disposed of correctly according to local regulations and good disposal practice. Gloves should be disposed of considering the hazardous substances they were used for. Please consider recycling.

Materials

1. Wing thumb
2. Rubber coated palm & fingers
3. Knit wrist

Marking

Description

Dromex® Gripper has a green textured crinkled rubber coating on the palm of the glove on a 7gg machine knitted (crochet) yellow reinforced cotton liner. This provides excellent grip and dexterity, making this glove ideal for use when secure grip is important. Suitable use in building, woodworking and wire industry.

Special Instructions

Although the manufacturer has examined these gloves under the system for ensuring quality of production by means of monitoring and inspection, we recommend that all gloves should be thoroughly inspected before use to ensure no damage is present.

None of the materials or processes used in the manufacture of these products are known to be harmful to the wearer. The gloves and information contained herein are designed to accommodate the basic safety requirements and standards for Personal Protective Equipment. Actual conditions of use cannot be directly simulated in a test environment, therefore it is the responsibility of the user and not the manufacturer or supplier to determine the suitability for intended use.
