RUBBERISED RAINCOAT

RUBCOAT/Y

RUBCOAT/O

RUBCOAT/B

Description

Dromex® RUBCOAT, knee/calf length rain protective attire is a comfortable water-resistant jacket, protecting the body and undergarments from the hazards of rain and water splashes.

RUBCOAT features a ventilated back with mesh lining and aeration holes under the armpit allowing the garment to 'breathe' so that sweat vapour can escape.

The RUBCOAT jacket design consists of a fixed hood with drawstring, two pockets with storm flaps, a heavy-duty full non-metal zip front with outer storm flap that has large plastic press studs for ease of use when wearing gloves. This raincoat has an outer storm flap and an internal storm cuff that prevents water from running down your sleeve.

All seams are double stitched and fully taped.

Suitable for applications where there is exposure to rain. Used in general mining, outdoor, and contractor applications.

Special Instructions

None of the materials or processes used in the manufacture of these products are known to be harmful to the wearer. The manufacturer has examined under the system for ensuring quality of production by means of monitoring and inspection.

These raincoats are designed to accommodate the basic safety requirements and standards for Personal Protective Equipment. The information contained herein is intended to assist the wearer in the selection of personal protective equipment. Actual conditions of use cannot be directly simulated in a test environment therefore it is the responsibility of the end user and not the manufacturer or supplier to determine the raincoat suitability for the intended use.

Keep clear of open flames.

All raincoats should be thoroughly inspected before and after use to ensure no damage is present.

Compliance & Conformity

This raincoat is designed for protection against foul weather increments only as per the EN directive 89/686/EEC. The garment meets the requirements of ergonomics, harmless materials, comfort, aeration and flexibility as well as the water tightness of the garment.

Packaging, Storage & Obsolescence

The standard packaging for the rain jacket is as follows. Each raincoat is packed in pouch and sold as 20 units in a carton. Store the raincoats in the original packaging in a cool dry place and out of direct sunlight.

Cleaning & Maintenance

Raincoats should not be left in contaminated condition if re-use is intended especially if potential hazards exist.

The garments should be decontaminated before storage and re-use as indicated below:

Do not machine wash.

Do not bleach.

No bleach product may be used as the garment is not colourfast or structurally designed to withstand any bleach.

Do not iron.

This garment may not be smoothed or finished with an iron. Do not dry clean. This garment may not be commercially dry-cleaned. Cleaning of this garment is best done using a mild detergent with deodoriser, wipe clean wipe dry or air dry.

Disposal

All industrial waste should be disposed of correctly according to local regulations and good disposal practice. Raincoats should be disposed of considering the hazardous substance they were used for. Please consider recycling.
