### Sizes Available

8 - 11

### Packaging, Storage & Obsolescence

Packed 12 pairs per bundle and packed 120 pairs per carton for shipping. Store in a cool dry place. Stored correctly, the gloves physical properties will not change for up to three years.

### Cleaning & Maintenance

Gloves should not be left in a contaminated condition if re-use is intended especially if potential hazards exist. Before removal from the hands excess contaminant should first be removed from the gloves. Should this not be possible, it is advisable to ease left and right hand gloves off using the gloved hand and remove the gloves without the contaminant contacting the bare hands.

### How to de-contaminate your leather glove.

NOTE: Under no circumstances should leather submerged in water.

1. Prepare a lukewarm water solution using mild detergent.
2. Gently wipe your leather glove with a cloth.
3. In-order to reduce stiffening, allow the leather glove to dry naturally.

### Disposal

All industrial waste should be disposed of correctly according to local regulations and good disposal practice. Gloves should be disposed of considering the hazardous substances they were used for. Please consider recycling.

### Materials

1. Winged thumb
2. Gunn cut
3. Keystone thumb
4. Shirred cuff

### Marking

### Description

Dromex® GTIG pigskin full grain leather gloves are designed for TIG (Tungsten Inert Gas) welding or driver glove users. Consists of a tan dyed pigskin premium full grain leather, with a gunn cut, keystone thumb and shirred cuff. Reinforced with syntax thread and cotton bound cuff trim for additional strength.

### Special Instructions

Although the manufacturer has examined these gloves under the system for ensuring quality of production by means of monitoring and inspection, we recommend that all gloves should be thoroughly inspected before use to ensure no damage is present.

None of the materials or processes used in the manufacture of these products are known to be harmful to the wearer. The gloves and information contained herein are designed to accommodate the basic safety requirements and standards for Personal Protective Equipment. Actual conditions of use cannot be directly simulated in a test environment, therefore it is the responsibility of the user and not the manufacturer or supplier to determine the suitability for intended use.

Leather, a natural product, varies between hides due to thickness, scar tissue, etc.
