

Golden Hands™ Nitrile Gloves

GOLDEN HANDS™ Nitrile gloves are made from a synthetic rubber and are an ideal alternative where latex allergies are a concern.

Nitrile gloves are the superior glove choice with a higher puncture resistance than any other glove material and the first choice for medical professionals.

Features and benefits:

Comfortable for extended wear-reducing hand fatigue.

Nitrile gloves have three times the puncture resistance than latex and offer excellent protection against a long list of common and specialty chemicals.

Superior dexterity, especially helpful with fine delicate work

Nitrile gloves are waterproof, greaseproof and oil proof

Full finger textured and palm textured for optimum grip and use of intricate tools.

Nitrile exam gloves contain no latex proteins or accelerators.

Technical specifications:

Conforms to ASTM D3578-10 standard.

Chlorinated and/or polymer coated, powder-free.

Golden Hands™ nitrile gloves are made up of a synthetic polymer that exhibits rubber-like characteristics
