

Dromex

CUT5 APRON

TAEKI APRON 60120

Description

Dromex® Taeki, lightweight, high performance cut and contact heat resistant apron, is designed to minimise the risk of injury on the user, protecting him and his garments from potential hazards of abrasions, cuts, tears and high heat in the industrial workspace.

Available in a 60cm (width) x120cm (length), with adjustable clip on neck strap, two adjustable straps at the waist, provides an excellent fit, extra strength and support, protecting the users entire front side whilst being strong and durable for use.

The Taeki apron features the following:

- Clip-on adjustable straps
- High abrasive resistance
- Excellent cut resistance
- Washable
- Lint-free
- Heat contact resistance until 100°C
- UV resistance
- Keeps it properties in contact with light.

Suitable for use in the automotive industry, food industry, glasswork, foundry and cleaning environments

Special Instructions

None of the materials or processes used in the manufacture of these products are known to be harmful to the wearer.
The manufacturer has examined under the system for ensuring quality of production by means of monitoring and inspection.
These aprons are designed to accommodate the basic safety requirements and standards for Personal Protective Equipment.
The information contained herein is intended to assist the wearer in the selection of personal protective equipment.
Actual conditions of use cannot be directly simulated in a test environment therefore it is the responsibility of the end user and not the manufacturer or supplier to determine the apron suitability for the intended use.
All aprons be should be thoroughly inspected before and after use to ensure no damage is present.
Do not use this product for protection from high speed or serrated blade.
Do not use this product near moving machines or where there is a risk of entanglement.

Compliance & Conformity

Complies with the requirements of CE type examinations EN420 for innocuousness, EN 388 for compliance with directive 89/686/EEC Mechanical Risks (4,5,4,X) and EN 407:2004 Thermal Risks for Heat & Flame (X,1,X,X,X,X) .
Quality System conforms to ISO9001:2008 and environmental management system ISO 14001:2015 system certificates or acceptable equivalent.

Specifications

Style:	Grey, torso and lower waist, half-length apron, with clip on adjustable, neck and dual waist straps.
Material:	Taeki
Thickness of Apron:	7mm
Thread:	Taeki
Buckle:	Plastic
Straps:	Nylon
Apron black binding:	Polycotton

Packaging, Storage & Obsolescence

- TAEKI APRON 60120, is sold indivually and packaged in a polybag.

Cleaning & Maintenance

Taeki aprons should not be left in a contaminated condition if re-use is intended especially if potential hazards exist.
The apron should be decontaminated before storage and re-used as indicated below:

- Brush excess dirt and contaminant off.
- Wipe with a damp rag, soaked in mild detergent.
- 100% TAEKI aprons have proven that dry cleaning as well as laundering are suitable cleaning methods.
- We recommend that no bleaching or oxidising ingredients or any fabric softeners be used.
- Recommended washing temperature is between 40°C and 60°C (104~140°F) with mild detergents.
- The drying process may cause felting on the fabric surface. Drying temperature should not exceed 70°C (158°F).
- There is no remarkable impact on cut resistance during the normal life cycle of the apron. Depending on the apron construction, staining and cleaning method, the differences in shrinkage, weight loss, yarn strength and colour may occur.

In order to maximise the apron life cycle, we recommend the mildest possible cleaning conditions in terms of temperature, chemicals and cycle duration.

Sizes Available

Standard.

Disposal

All industrial waste should be disposed of correctly according to local regulations and good disposal practice. Aprons should be disposed of considering the hazardous substances they were used for. Please consider recycling.
